

## OLAA DEALINGS FAR EXCEED ALL OTHERS FOR DAY

In advance of the meeting of the directors of the Olan Sugar Company the stock of that company was heavily traded in, following the precedent of the past several days. This trading was on the assumption that following the meeting there would be important announcements as to dividends and the dividend policy of the company.

Mineral Products was quoted as having fallen off 5 cents from high figures and was offered at 90 cents.

Honolulu Oil was quoted firm at \$3.45, and Enclis Copper stood unchanged at \$2.95 bid and \$3 asked, with no offerings at the bid figures.

It was a day of heavy trading in which Olan was dealt in chiefly and more shares of that stock handled than are ordinarily handled of all stocks in a day's transactions. In all there were 4920 shares of Olan reported in the list of sales, out of a total in all stocks of 6825.

U.S. Gov. experts report that oils correctly refined from asphalt-base crude "distill without decomposition" (do not break up and lose their lubricating value under cylinder heat) and "are much better adapted to motor cylinders, as far as their carbon-forming proclivities are concerned, than are paraffine-base Pennsylvania oils."

Motorists who use Zerolene, an oil scientifically refined from asphalt-base crude, back up the experts with reports such as these: "Covered over 16,000 miles without adjusting valves or cleaning out carbon."—"The carbon taken out of this car in 50,000 miles amounted to less than an ounce." Zerolene is for sale at dealers everywhere and at service stations and agencies of the Standard Oil Company.
